

# ONE1Net

## Get Connected!

oneNet is here! Taking full advantage of the limitless possibilities provided by the Internet, our latest offering will allow your customers to place orders from supported Internet access devices. Initially, PCs running Microsoft Internet Explorer will provide access. Other devices, such as kiosks, Personal Digital Assistants (PDA's) and WAP phones will be supported in future releases.

## The Latest Internet Technology.

oneNet employs state of the art technologies. Developed on the .NET platform **HOT**User Interface features like using "Flash" features allowing customers to interactively build their pizzas, add their side items and beverages, and then click their orders, *directly* to you.

## Your Own Web Site!

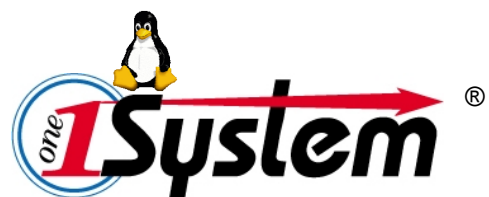

The customer will connect to your oneNet Web Site, create an order and transmit it directly to your oneNumber Call Center.

A truly interactive experience, oneNet features **your** name, **your** logo, **your** menu, **your look and feel**. No need to be lost in an endless list of restaurants on an Internet Service. Put **your** name at the **TOP** of the list. Better yet, eliminate the list!
