The Business End of Our System

Store Business, that is. oneSystem POS is a full function POS system with all of the features and functions you have come to expect. Order entry, driver dispatch, time clock, scheduling, inventory, suggested order, ideal food cost and much more. In addition, having served many clients over the years you can have it, **your way.**

"Setups-R-Us"

oneSystem goes the extra mile with a setup and security matrix like no other. Getting oneSystem to fit your business is a **setup** away. Virtually every aspect of oneSystem can be configured without software modifications to meet your ever changing business needs.

Capture the Data, Move the Data

In addition to a comprehensive built in reporting suite with over 60 standard store reports, this same data can be automatically exported for polling. You are able to poll this data direct from the stores and move it into our oneServer data warehouse.

A Call Center is in the Box

Your Call Center awaits you. oneSystem is the only POS offering that comes out of the box designed and ready to link to our **oneNumber Call Center.** Ask for details!
