

ONE 1 Server

All the Numbers are Here!

The Enterprise is complete! The data warehouse and reporting tool that completes your enterprise is now available exclusively from oneSystem. Introducing oneServer, a Microsoft® SQL Server based solution running under Windows NT/2000. This all new offering allows you to poll data from your oneSystem POS.

Microsoft® SQL Server

Once data is collected, your Microsoft® SQL Server database is automatically updated. The oneServer database can be located at your office where you can link directly to outsourced payroll and accounting services or your own back office systems.

Reporting that Counts

To complete your data management needs, you can choose between added services from oneSystem or local vendors to create reports and database queries. There are a variety of tools available on the market today such as Crystal Reports™ or Microsoft® Access that will perform these functions. Coupled with oneServer, these tools makes counting your results as easy as 1 2 3.

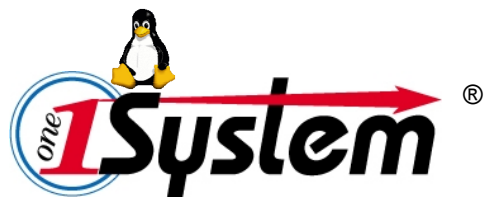

CRM

The latest addition to oneServer, CRM Tools that let you see who is ordering what, when and where. Manage the most important asset in your business. Increase loyalty and sales.
