

## Annual Upgrades, Annual Planning!

Introducing the annual upgrade program, oneSoft. For a fixed annual fee, paid monthly, receive ALL of the onePOS and oneNumber upgrades as they become available. oneSoft is priced based upon the number of store locations and in the case of a Call Center a basic Call Center charge plus a fee for each connected store.

## Ready When You Are!

oneSoft allows you to upgrade when you are ready, with a minimum of one (1) annual upgrade being made available. Should you choose to upgrade only once every two or three years, your upgrade charges are paid in full. The only charges that we will apply are for labor and materials to assist in the upgrade process.

## In-Put, In-Put!

We will provide you with a forum to present your ideas and development suggestions, This will occur at oneConference our annual gathering of users. This is your opportunity to provide us with idea's and feedback on the features we have developed and the functions to come. We will take the input received at oneConference and prepare a development plan that will be worked over the coming year.

Custom development requests can also be presented at any time and a project to create the needed enhancement will be developed and implemented for you.
